FOCUS OF THE COLLECTOR

Magic item
Legendary

A necklace with a ball shaped pendant that contains a purple mist with star like lights in it. The pendant features a small slit of just the right size for a special kind of coins.

Once at least **1 fitting coin** has been inserted, the pendant starts shining brightly and the wearer has to roll a **d8** on the spell table associated with the amount of coins inserted. A capsule appears that can be used by its *creator* to cast the resulting spell at the lowest defined level without the wearer needing to use a spell slot. The spell is casted with the **Charisma Modifier** and **DC 14**.

Every **5 coins spent**, the wearer can decide to instead roll on the **Special Event** table and create a capsule that casts the resulting spell on a level equal or lower as the amount of coins inserted. If this opportunity isn't used, the counter of coins needed resets to 0.
